WELCOME MESSAGE

We are privileged and honored to welcome you to the 2020 ASIA PACIFIC Anti-Aging Conference (APAAC) from December 11th to 13th, 2020 at EXCO Convention Center, Daegu, South Korea. The Conference is hosted by the Daegu Metropolitan City Government and organized by the Asia Pacific Anti-Aging Society (APAAS).

As one of Korea's 3rd largest cities, Daegu is the country's leading medical center renowned both in Korea and abroad. 'Medicity Daegu' is a brand that represents the city's superior medical services and infrastructure including 6 university hospitals, about 3,700 hospitals, and clinics, and a medical workforce of about 23,000. The city also boasts the Daegu-Gyeongbuk Medical Cluster and Suseong Medical Zone.

Currently, the city is heavily investing in the medical area along with future vehicles, energy, robots, and the Internet of Things, and water industries. Notably, Daegu Metropolitan City Government has been carrying out the 'Medivalley' project which is a high-tech medical-industrial complex established for the purpose of developing the Korean medical industry into a leading industry worldwide. The project began in 2009 and groundbreaking for Medivalley officially took place in October 2011. It is scheduled for completion in 2038 with a total budget of USD 4.6 billion.

The 2020 APAAC is the only professional medical conference for doctors and medical practitioners in Korea, in the field of the prosperous Anti-Aging Industry, aiming at positioning it as a leading conference in Asia and Pacific region. In particular, to cope with COVID-19 worldwide outbreak, the 2020 APAAC will offer various online programs that participants can have at home without visiting Korea. We invite you to enjoy and take advantage of this unique event to promote your medical knowledge and other interests as much as possible. We sincerely hope you could join in the 2020 APAAC and cooperate together!

*Chair of the organizing committee of the 2020 APAAC
Vice Mayor for Economic Affairs, Daegu Metropolitan City Government*

Eui Rak HONG

Thank you for visiting the 2020 ASIA PACIFIC Anti-Aging Conference (APAAC)

We prepared a variety of themes and topics in the 2020 APAAC with over 80 Korean and foreign speakers.

The 2020 APAAC is composed of plastic surgeons, dermatology clinics, hair transplants, dentists, and Paramedic Programs. All courses are conducted with Lectures and Live Video Session to strengthen the expertise and know-how accumulated in the past to spread the excellence and expertise of Korean medical technology and to share clinical knowledge.

Reflecting on the COVID-19 Pandemic situation, the event runs in a way high-tech online. We will do our best to ensure that the event is managed safely and conveniently by complying with the COVID-19 guidance from the Korean Government and WHO.

I hope you will upgrade your medical expertise and techniques through this training program by acquiring the latest techniques and building networks with renowned lecturers from home and abroad and other medical personnel from more than 10 countries.

Sincerely hope we can meet in Daegu, South Korea or online.
Best Wishes,

*Chair of Asia Pacific Anti-Aging Society
Prof. of Daegu Catholic University Medical Center*

Dermatology

As Korea was the first country in Asia to hold the ISDS(International Society for Dermatologic Surgery) and half the 170 speakers were Korean doctors, Korean dermatology can be said to be world-class. Likewise, of the 200 overseas doctors attending the 2019 APAAC, 100 doctors signed up for the dermatology program. In the Dermatology program of the 2020 APAAC, Korea's best dermatologists from Kyungpook National University Hospital will demonstrate amazing treatment methods for skin tumors and diseases. Besides, the International and domestic top dermatologists from prestigious medical schools and famous Dermatology Hospital will conduct lectures and live video sessions for obesity and scar treatment and brightening, with a focus on practical techniques and procedures. Led by these excellent instructors, the 2020 APAAC Dermatology Program will help doctors and participants acquire K-beauty dermatology techniques.

Hair Transplantation

As the hair transplantation industry is emerging worldwide, the status of Korea, which has the hair transplantation market of 4-billion dollars is increasing day by day. In particular, Daegu is the place of origin for hair transplantation in Korea as it has Kyungpook National University Hospital Hair Transplantation Center which performed and developed hair transplantation for the first time in Korea. At the 2020 APAAC in Daegu, professor Dr. Jeong Chul Kim who developed follicular unit transplantation with a survival rate of 92% or over for the first time in the world will give you a key introductory lecture. Also, many other Korea's top hair transplantation doctors and international competent specialists will help you acquire the sophisticated and advanced hair transplantation technology. This year, we will specifically focus on the comparison between FUE and FUT and the introduction of many other new hair transplant devices such as Multi-implanter. And also, this conference will be held co-hosted by the Korean Society of Hair Restoration Surgery (KSHRS). We encourage you to acquire knowledge and skills through specialized instructors and in-depth lectures.

2020
APAC

Dentistry

Dental treatment in Korea has a high reputation due to the distinguished dentists, the quality of materials, and advanced technologies. In particular, Daegu is a medicity having the largest Korea's dental infrastructure including 14 dental hospitals, 802 dental clinics, and 54 dental medical device companies. This year, the 2020 APAAC dentistry focuses on dental implant and digital dentistry. Specialists working for Kyungpook National University Dental Hospital will help you catch innovative technologies in practical dentistry. Professors from Korea's leading university hospitals and outstanding overseas speakers will provide high-quality lectures and practical courses. In addition, Korea's sophisticated and excellent implant technologies will be introduced in collaboration with international Korean implant companies which are famous not only in Korea but also in other countries.
